(a) A licensee may cease operations at the licensed establishment for up to 90 consecutive days without administrative approval. Unless an extension is granted under this section, the license becomes void and invalid at the end of the 90th consecutive day after operations cease. This subsection does not apply to the period immediately following the initial issuance of a license and before the licensed establishment first opens to the public.

(b) To remain closed beyond the period authorized by subsection (a), the licensee must submit a written request for an administrative extension before the end of the 90th consecutive day after operations cease. For good cause shown, the City Manager or designee may grant an extension in writing and may impose conditions reasonably related to the resumption of operations and compliance with this chapter. The written decision must state the duration of the extension.

(c) A request for a second or subsequent extension must be submitted before the current extension expires and must include a written plan stating the reason operations have not resumed, the steps being taken to resume operations, and the anticipated reopening date. The City Manager or designee may grant an additional extension only upon approval of the plan and a finding of continued good cause.

(d) A license becomes void and invalid at the end of an approved extension unless, before the extension expires, the licensed establishment resumes operations or the City Manager or designee grants an additional extension under subsection (c).

~~No license issued under this chapter shall be valid which has been inactive for a period of 90 days or more from the date of approval of the license, except that the licensee may make written request to the city council for an extension of the period of validity and the City may grant such extension. Any license which has remained inactive for more than 90 days from the date of approval shall be void and invalid, except that any license which has been extended as above provided and which has remained inactive through the last day of the extension period granted shall be void and invalid.~~

Any person seeking a license under this exception shall submit an application provided by the business license division. In the application, the applicant shall identify relevant facts supporting at least five of the above factors. Prior to approving a license under this exception, after analysis is provided and a recommendation is made by the executive director of the redevelopment agency or his designee, the city council must make a finding that at least five redevelopment goals identified above will be satisfied as a result of issuing the license. Even if a business satisfies at least five redevelopment goals identified above, the city council may deny a license under this exception if under the facts and circumstances presented it determines that the overall goals of redevelopment would not be substantially furthered by the business. As a condition of issuance of a license under this exception, the applicant shall enter into an agreement prepared by the redevelopment agency requiring at a minimum that the business shall (i) maintain the exterior of its building and other exterior improvements of the business in a clean, orderly and safe condition; and (ii) conduct its business, without material modification, in accordance with the qualitative, quantitative, graphic, pictorial and other specific criteria represented to the city council in obtaining the license. To the extent that a business receives a license under this exception and the business fails to continuously comply in any material way with all qualitative, quantitative, graphic, pictorial, or other specific criteria represented to the city council in obtaining the license, it shall be grounds for immediate suspension and/or revocation of the license. ~~b. the predecessor business' license must not have been denied or revoked for any reason, including but not limited to those identified in sections 4.04.150 of the Code and the predecessor business must not be subject of denial or revocation proceedings or have received notice of future denial or revocation proceedings which ultimately result in the denial or revocation of the predecessor business' license;~~

~~c. if the predecessor business' license has been suspended, is subject of suspension proceedings or the predecessor business is on notice of a suspension proceeding, the application will not be considered until the suspension proceedings are resolved in favor of the predecessor business or the suspension has been fully served and the predecessor business's license is in good standing;~~

~~d. the predecessor business must not, prior to the filing of the business license application, have failed to timely renew its license; and~~

~~e. the predecessor business must continue doing substantial and continuous business with the public at the location up until the time the application is received by the City.~~

~~b. the business is able to demonstrate compliance with the standards for the Packaged Alcoholic Beverage Sales Accessory to a Primary Use as outlined in Title 18.~~

(1) For the purposes of this chapter, grocery store means a retail establishment primarily engaged in the sale of a full range of food products and household goods for off-premises consumption, including fresh produce, meat, seafood, dairy products, baked goods, frozen foods, packaged foods, beverages, and other grocery items. Grocery stores are intended to serve routine household shopping needs by offering a broad selection of staple food products and may include accessory uses such as a bakery, deli, pharmacy, floral department, or café. A grocery store is distinguished from a convenience store by offering a substantially wider variety and quantity of food products, including fresh and perishable items, and by providing a full-service shopping experience rather than a limited selection of convenience items. The establishment must routinely stock and offer for sale a broad selection of staple food products, with at least 95% of retail floor space dedicated to food products.

(2) The business must not be primarily a convenience store, specialty food store, or limited selection retailer.

(3) The applicant must submit documentation demonstrating compliance with the above criteria, including inventory lists, and floor plans, as part of the license application process. The licensee shall maintain compliance throughout the term of the license. Failure to comply may result in suspension or revocation of the license.

(4) The Council retains discretion to approve, approve with conditions, or deny any application for a package alcoholic beverage license under this exception. If an applicant does not strictly satisfy every criterion listed in paragraph (1), the council may nevertheless approve the application if it finds that the business substantially fulfills the purpose and objectives of the grocery store exception, provides a full-service shopping experience for routine household needs, and is not primarily a convenience store, specialty food store, or limited selection retailer. Any denial or conditional approval shall be based on relevant criteria, including any legal basis that is not arbitrary and capricious.
