

# City Manager's Office

---

## MEMORANDUM

**DATE:** 2/3/2023

**TO:** Mayor and City Council

**THROUGH:** Doug Thornley, City Manager Approved Electronically  
Jackie Bryant, Assistant City Manager

**FROM:** John Flansberg, Regional Infrastructure Administrator  
Trina Magoon, Director of Utility Services

**SUBJECT:** **Status of Sewer Allocation for Reno Stead Water Reclamation Facility**

---

This memorandum is provided as a regular update on the status of available sewer capacity and projects pending approval to be served by the Reno Stead Water Reclamation Facility ("RSWRF"). **Two projects have been added to the allocation list since the December 13, 2022 memorandum.** These two projects only used nominal sewer capacity (356 gallons and 97 gallons respectively).

Council provided direction at the June 1, 2022 meeting to increase the amount of the flow shave capacity by 100,000 gallons for a total of 225,000 gallons\* of the 500,000-gallon flow shave capacity available. The remaining sewer allocation available at this time for development is 31,528 gallons or 191 equivalent residential units (ERU's) and using the new average of 165 gallons per ERU vs 175 gallons per ERU that was used previously. The RSWRF detailed worksheet is attached to show sewer allocations made beginning in January 2021.

Per the presentation at the January 25, 2023 City Council meeting, staff will bring an agenda item to Council in the near future requesting an increase to the sewer allocation program utilizing additional sewer capacity from the flow shave project.

\* Council direction 9/11/2019 (75,000 gallons); 11/4/2020 (50,000 gallons); 6/1/2022 (100,000 gallons).
